UTILIZING INDIVIDUAL REPORTS

Utilizing individual reports within your Wisconsin Registry account can determine the next steps for professional development. One report to highlight in aiding with professional development is the **Content Area Summary report**. This report, which also can be labeled as Core Knowledge Summary, totals all training hours by content area, which houses the core competencies. **Core competencies** are expectations for what the workforce should know (content) and be able to do (skills) in a respectful & competent matter (attitudes) in their roles working with and/or on behalf of children and their families. The core competencies are organized within 12 content areas. Based on the Content Area Summary report, an individual may determine they need more training in one content area over another.
