

Registry 21-Day Document Submission Window

Effective November 6, 2025

Beginning on November 6, 2025, the Wisconsin Registry is updating the time frame individuals have to send documentation after submitting their online membership application.

Members will now have 21 days to send their documentation after completing the online membership application. After 21 days, the Wisconsin Registry will cancel applications that have not submitted the necessary documentation. This update aligns with best practices and will help streamline our membership application processing.

Please note: During this 21 day period, the Wisconsin Registry will continue to send communications to inform individual applicants what documents are needed to verify information on their application.

Contact the Wisconsin Registry if you have additional questions:
